Question: Written comments.

Professor Ribant was very patient with all the students and had great knowledge. He was willing to help students after class hours, which not many teachers do. Overall, it was a great class and would take another with him.

great teacher

Professor Ribant had an extremely helpful method for our weekly assignments in the form of 'cookbooks.' The screen captures and step by step guide were a fabulous tool that will be an easy reference for future GIS work. Looking forward to more courses with this method of instruction. Have even persuaded other classmates to continue on with GIS for sake of this professor. Cheers.

Professor Ribant is a smart man and is very knowledgeable in the field of GIS. He is approachable with questions and he tries to help students as much as possible with understanding the material. NEIU is fortunate to have a good guy like him teach here. Thank You!

Solid all around

This class was a wonderful introduction to the GIS program and was taught in a manner that was natural and accommodating to those who are just beginning in this field. Highly recommended.

Great professor. Presented the information in a very logical and informative matter. Was always around for assistance.

Loved this class! I was able to exceed in it even though I am somewhat technology challenge and alot of that had to do with the Professor he understood that we are just normal students.

Instructor demonstrated mastery of the material covered. It was a pleasure to attend lecture.

Professor Ribant is one of the best instructors, I hope he teaches GIS 1 in GES.

Professor Ribant did a great job in teaching us a good amount of material while being conscious of our workload at the same time. I can tell he really valued each student and wanted to help them as much as he could with projects/assignments/labs. Great class and great teacher!

This is what a GIS course should be, learning and using the software with guidance and completing labs based on clear instructions. I don't think I have ever had a professor more helpful and dedicated to his students than Mike Ribant.
